About This Content

The popular EMD SD45 is now available for Train Simulator in three recognisable liveries of the Norfolk Southern Railway.

Built between 1965 and 1971, the EMD SD45 was most at home hauling high-speed freight and intermodal services, although could occasionally be seen at the head of some passenger services. More than 1,200 models were built and operated services for a number of US railroads, although their reliability issues make them a rare sight today.

Norfolk Southern's predecessor railroads date back more than 100 years, with Norfolk & Western being formed in 1881 and the Southern Railway System forming in 1894. Norfolk Southern was created in 1982 from the merger of Southern and Norfolk & Western, with the headquarters of this new company established in Norfolk, Virginia.

The EMD SD45 for Train Simulator, developed by DigitalTrainModel, is available in Norfolk Southern, Southern and Norfolk & Western liveries, and features five new freight wagons, including Airslide Hoppers, 50ft Boxcars, 52ft Gondolas with three loads, and Caboose. A feature of the Norfolk & Western EMD SD45 are fully functioning dual controls, which allow the driver to operate the locomotive in either 'long hood' direction or 'short hood' direction.

The locomotives are also Quick Drive compatible, giving you the freedom to drive the Norfolk Southern SD45 High Hoods on any Quick Drive enabled route for Train Simulator, such as those available through Steam. Also included are scenarios specifically for the [Horseshoe Curve](#) route (available separately and required to play these scenarios).

Scenarios

Four scenarios for the Horseshoe Curve route:

- Nap time
- Turn in Slope
- Lost among wagons
- Too much rain and very few wagons

More scenarios are available on Steam Workshop online and in-game. Train Simulator's Steam Workshop scenarios are free and easy to download, adding many more hours of exciting gameplay. With scenarios being added daily, why don't you check it out now!

Title: Train Simulator: Norfolk Southern SD45 High Hoods Loco Add-On

Genre: Simulation

Developer:

Digital Train Model

Publisher:

Dovetail Games - Trains

Franchise:

Train Simulator

Release Date: 12 Sep, 2013

b4d347fde0

English

i really like the opening doors, and windows, liked that u put gauge lights on the gauges.. 5V10 the horn gets stuck and does not stop blowing unless you go into the cab and release the horn. other than that engine looks great.. If you like sturdy freight locs with roaring engines then this is the the one to buy! The NS livery is my personal favorite because you can open the windows, stick your head out and enjoy the blasting sound. Even the horn sounds great!

The amount of traction will not disappoint you either.. This mod would be so much better if it didn't have a loco for every car that you have in your consist.
